

# Care instructions

## Instructions:

A standard vacuum cleaner can be used to remove loose dirt from the SeaDek®. We recommend using tap water for cleaning. Moisten the material with clean water and then brush in the direction of the brush marks using a soft brush (e.g. scrubbing brush or dishwashing brush).

Please do not use river, lake or sea water, as this contains suspended matter and odorous substances from algae, trees, fish and ducks. For more stubborn dirt, a gentle cleaner is suitable. It is important that this is biodegradable, as cleaning residues often end up in natural waters. An environmentally friendly example of this is Marine Magic™.

## Ordering

Feel free to email [seadek@seadek.de](mailto:seadek@seadek.de) to order Marine Magic™.

The cost per liter is €39.95 plus shipping.
